

The world's first USB interface made for StereoTool (and other software processors).

Output activity LEDs.

Powder-coated steel enclosure.
RFI immune circuitry.

Power-indicator.
(Kinda important)

Enable the analog output
or the multiplex output.

Choose analog or digital source.

Stereo analog input and output on StudioHub+

Dual multiplex (composite) outputs on BNC connectors.

AES/EBU input adapts to the sample rate of your source.

USB connection to your host computer running StereoTool.

Digital composite (AES 192) output for advanced transmitters.

Built-in AC-DC power supply. No wall warts here.
